

OLEODINAMICA MARCHESINI

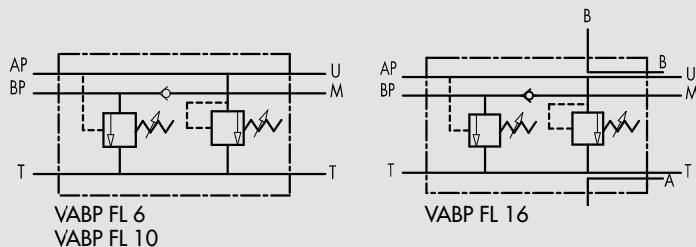

10.2 - VALVOLE DI ESCLUSIONE ALTA-BASSA PRESSIONE FLANGIABILI PER PIASTRA NG6-NG10 E NG16

TIPO / TYPE
VABP

10.2 - TWO PUMP "HI-LOW" UNLOADING VALVES FLANGEABLE (BASE NG6-NG10 AND NG16)

SCHEMA IDRAULICO
HYDRAULIC DIAGRAM

IMPIEGO:

In un circuito alimentato da due pompe in parallelo, valvola utilizzata per mandare a scarico la pompa di maggior portata al raggiungimento di un determinato valore di taratura. Da questo momento in poi l'attuatore lavora con la pompa di minor portata a pressione maggiore, consumando meno energia. È stata studiata appositamente per la flangiatura diretta all'elettrovalvola.

MATERIALI E CARATTERISTICHE:

Corpo: acciaio zincato

Componenti interni: acciaio temprato termicamente e rettificato

Guarnizioni: BUNA N standard

Tenuta: a cono guidato. Trafilamento trascurabile

MONTAGGIO:

Fissare la valvola alla centralina collegando BP alla pompa di maggior portata, AP alla pompa di minor portata, T allo scarico e M all'eventuale manometro. Flangiare l'elettrovalvola alla VABP e collegare gli attacchi A e B all'attuatore.

USE AND OPERATION:

This valve is used in a 2 parallel-working pumps circuit in order to release the excess of the higher flow pump to the tank when this gets the required pressure setting. Since this moment and on the actuator works with the lower flow pumps at higher pressure, consuming less energy. It's ideal for direct flange-mounting on solenoid valves.

MATERIALS AND FEATURES:

Body: zinc-plated steel

Internal components: ground and hardened steel

Seals: BUNA N standard

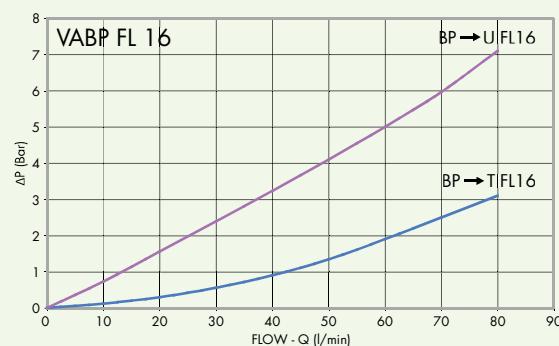

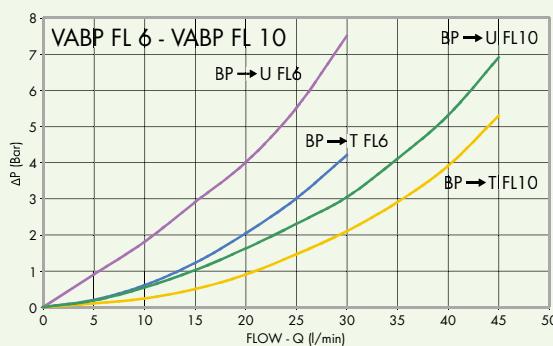

Tightness: minor leakage

APPLICATIONS:

Fix the valve to the pressure flow by connecting BP to the higher flow pump, AP to the lower flow pump, T to the tank and M to the eventual manometer. Flange the solenoid valve to the VABP and connect ports A and B to the actuator.
